After playing this game for about 30 minutes, and beating stage 1, I've had my fill. This game is terrible.

This is a first person adventure game, with first person shooter elements but the slow gameplay is really unappealing for fans of fast action first person shooters. Don't come into this expecting that. If you come into this expecting a fun and interesting adventure game, you will be disappointed too, as this is not worth your time compared to many much better adventure games available today.

This game has a long list of problems. It has no audio/video settings, no control settings, no game introduction or cutscenes or anything to explain to you what is going on. The game doesn't even have a manual.

The controls are easy enough to figure out though, I had no problem with that, but the fact that you can't remap them is pretty pathetic.

Fighting with enemies is slow and annoying, I found a Wrench in level 1 but it doesn't really work very well.

The game just has an overall lack of polish, it really feels like early access.

Skip this game, it has nothing going for it that hasn't been done better in many other games.. Feels hastily thrown together, just for a basic asset flip.

Its real shame that seems to be the case, it has a ton of potential to be a short action horror game worth a few bucks.

I would definitely love to see the game remastered with a lot more polish.. Not a bad game for the price. There are pluses and minuses. I recommend to play around and find out for yourself.

The game will find its admirers.. Feels hastily thrown together, just for a basic asset flip.

Its real shame that seems to be the case, it has a ton of potential to be a short action horror game worth a few bucks.

I would definitely love to see the game remastered with a lot more polish.. This game was going to get my thumbs up until I find out that once you finish level 1 or chapter 1 the game shuts down immediately...

I tried to reinstall the game, validate the game files, nothing has worked for me...

& for this you get a thumbs down.

4/10. i dont know what to rate this game it starts out good but it always crashes during the boot screen to the second level. Wtf guys, Random PewDiePie picture, Fat Guys With giant Nipples. And when you Interact with sh!t you lean towards the right XD. Well Done 10/10 would play again. Oh Yeah, Can I get my 2,99 euro's back.... I actually enjoyed it, but then I have a thing for "bad", B-movie style first-person shooters (most other people don't, obviously!). I thought it was an entertaining and atmospheric, albeit very simplistic, shooter with some interesting level design and cohesively used assets. The game did crash several times during loading, but that seems to be unavoidable when it comes to games made with FPS Creator. I just wish it had been longer \u2014 I would've gladly spent an hour or two more with it \u2014 but considering what I paid for it (\u20ac0,59) I think an hour of gameplay was totally acceptable!

This is a horror themed FPS with a lot of problems.

The game was clearly made on the cheap with a free game engine. It's full of bugs, lacks stability, runs poorly, and looks terrible. There's no graphics settings available so you're stuck with the way it looks. The whole game is so amateurish it comes together like a half-finished weekend project from high schoolers.

At \$3 this "game" is massively overpriced.. ya get what ya pay for...however, game is hinkey; for example, the 'saving' came up on my screen and stayed there...

????

Even though my automatic weapon had plenty of ammo, failed to shoot costing me progress up the stairs.

Little things like that take away the fun and ability to move along.

Oh well...

Buy at your own risk....

. Plonked together using the most foul engine in existence: GameGuru. Hideous.

For starters, the game itself is completely deprived of any sort of fun factor and simply involves opening doors and reaching the exit with very little inbetween while fending of a few generic enemies. There's nothing more to it. There's also no apparent storyline, so nothing even makes any sense and you have no feeling of accomplishment whatsoever.

This handiwork is also plagued by various bugs:

Loading the game causes frequent crashes. (courtesy of GameGuru).

Enemy soldiers have lightning reaction and kill you in one hit, causing the game to reload and thus eventually crash to to the aforementioned issue. This creates a frustrating vicious circle which not even a saint would choose to put up with.

The game has no redeeming features at all but on the other hand is so bad that it could be considered of moderate comedic value.. ya get what ya pay for...however, game is hinkey; for example, the 'saving' came up on my screen and stayed there...

. Lot of bugs i liked it at first but kept falling through the floor and having a gun in a game like this doesnt feel that scary to me..
